PERSONALIZED CARE

We know that in order to best serve your child we must work in partnership with our families to deliver a positive, loving, warm, and caring environment for your baby. We work with you to develop a personalized care plan and transition into our environment that meets the needs of your family.

PHYSICAL & COGNITIVE DEVELOPMENT

Your infant is a unique and wonderful sponge for information. Our environment, teachers, curriculum, music and food are all crafted with care to ensure your baby gets everything they need and more to thrive in the world around them..

DAILY TRACKING

We use the Brightwheel platform to create a transparent window into the nursery. This means our parents receive live updates of what is happening in the classroom. Each day you will know what your child has done to work on their development, how much and what they have eaten, how many times diapers were changed, and when you need to bring anything in for your baby!

CLEAN AND SAFE

Our classrooms are cleaned throughout the day by our onsite cleaning team. Cribs are washed daily, toys are sanitized as the infants play with them, and we use an electro-static fogger to eliminate any toxins or virus that could be transmitted, each and every day.
